

Procedures for safe lifting and hoisting operations

Learn all there is to know about lifting and hoisting procedures and improve the safety of lifting and hoisting operations with your own company specific procedures!

This hands-on seminar will provide attendees with an understanding of how to set-up, roll-out and audit their company specific lifting and hoisting procedures. The seminar will deliver tools, templates and insight that will allow participants to immediately improve on safety and begin implementation within their organization/firm.

Go home with the draft version of your company specific lifting and hoisting procedure!

Regardless of location, weight of the load, construction or maintenance activities, whether it is onshore or offshore: this seminar will deal with all operational aspects and provide you a "safe system of work" that you can apply for any imaginable lifting and hoisting operation and provide you with a set of control measures that:

- Will improve your safety statistics
- Makes sure your company works in compliance with rules and regulations
- Brings your company in compliance with the most commonly used best practices, such as the Lifting and Hoisting safety recommended practice from the International Association of Oil and Gas Producers (former OGP), IMCA guidelines for lifting operations, Oil & Gas UK best practice.
- After the seminar you will have your own template for company specific lifting and hoisting procedures, that will bring your company instantly in compliance with applicable rules and regulations

Lifting and hoisting operations are among the major causes of fatalities and serious incidents and have proven to be hazardous activities. Lifting, hoisting, transport and mechanical handling related incidents accounted for a major part of all reported incidents worldwide. Next to injury or death a huge amount of direct and indirect costs are involved caused by the damages. Project delays due to damaged long-lead items might result in your project coming on stream several months later than planned.

In order to address this, the seminar will bring you an easy to implement procedure based on current experience, good practice and audited proven results within a major Oil & Gas company.

Target audience

The seminar is aimed at everyone who holds responsibility for safety and the execution of lifting and hoisting operations. The seminar also provides insight to many legal aspects of lifting and hoisting that work knowledge widening for other functions in which one having to deal with lifting and hoisting. For example: logistics coordinators, planners, lifting supervisors, contract holders, buyers of lifting and hoisting equipment, HSE coordinators, HSE staff, incidents investigators, constructors of work equipment, job owners, maintenance managers etc.
